THE HISTORY OF CLASSIC GUTTER SYSTEMS

In 1991, Classic Gutter Systems of Galesburg, Michigan invented the reverse-bead half-round gutter and designed the first reverse-bead half-round gutter machine ever made. For three and a half decades, Classic Gutters has been committed to the development of half-round gutter and the half-round gutter industry.

The main reason behind Classic's passion is the half-round profile itself. It is the most efficient and represents a pure, natural trough design, making it superior to all other gutters. In particular, over a flat bottom gutter because the water is funneled to one concentrated low point, and therefore drains much more efficiently, like the round plumbing for your home.

The company's goal was to supply reverse-bead half-round gutter systems throughout the country, so Classic developed a full range of accessories to accommodate any project or installation need. This includes Classic's signature Cast Fascia Brackets, the gold standard in half-round brackets, and many specialty cast offerings. (see pages 5-14)

Simplicity and ease of installation are key, so all of Classic's Fascia Brackets are designed to attach to a length of half-round gutter while still on the ground, saving time and reducing ladder work. Once assembled, the gutter with the half-round brackets already attached, can be lifted into place and installed together as a single unit. This ensures proper grading and correct installation in less time than ever before.

Classic boxes and ships half-round gutter and accessories all around the country. However, some installers prefer the efficiency of having their own 6" & 8" reverse-bead half-round gutter machine. As a result, in 1996 Classic began manufacturing machines for installers who use their accessories. (see page 25) It allows installers to produce seamless reverse-bead half-round gutters on-site, saving time, increasing efficiency and driving sales of Classic's high-quality, reasonably priced accessories.

Along with the half-round gutters, it was also very important to educate people on the advantages of round downspout. After all, you would not plumb your house with rectangular or square PVC. Classic's selection of bracketry for round downspout is extensive. (see pages 15-20)

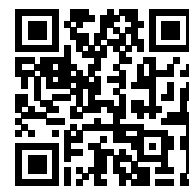

In keeping with their commitment to innovation, in 2010, Classic began producing seamless radius gutter in Copper, Mill-Finish Aluminum, Galvalume and 4 Aluminum Colors. All are made in 9' or 11' seamless lengths. Unheard of before! (see page 2)

Classic has taken another leap forward in 2025 with the introduction of two new revolutionary patented half-round gutter brackets, The Strongback® and The Beast®. These long-overdue innovations include a redesigned intelligent stamped fascia bracket and an internal quick screw bracket that increase strength, speed, and efficiency. (see pages 3 & 4)

For over 35 years, Classic has remained dedicated to advancing the half-round gutter industry and will continue to focus on innovation in the years ahead. Classic's goal has always been, and will continue to be, to make half-round gutter jobs simpler and less intimidating to K-style installers and to educate the public of the superiority of half-round gutters and round downspout.

SEAMLESS RADIUS GUTTER HALF-ROUND & K-STYLE

SEAMLESS RADIUS GUTTER AVAILABLE IN 9' OR 11' LENGTHS

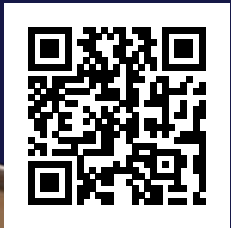

*See Page 26
For Examples*

Seamless Radius Gutter Available in:

- ✦ 9' or 11' seamless lengths

UV TESTED TO
15 YEARS WITH NO
DEGRADATION

- ★ The Beast® is Classic's new patented internal quick-screw fascia bracket for 6" and 8" half-round gutter
- ★ Designed to support half-round gutters with no need for tie straps going back to the roof or fascia
- ★ Attach to a length of half-round gutter on the ground, then lift in-place as one unit with single screw installation
- ★ This makes the speed of the job comparable to K-style applications
- ★ 4 1/2", 5 1/2", and 7 1/2" hardened 5/16" engineered lags with 1/4" hex-head for your convenience
- ★ 7 1/2" lag to be used with our complete line of wedges for angled fascia in 45°, 37.5°, 30°, 22.5°, 15° and 7.5°
- ★ An innovative 0° wedge allows the Beast® to mix with the Strongback® or Cast Fascia Brackets
- ★ Superior design & manufacturing ensure no water can escape through fasteners and rot wooden fascia
- ★ UV tested to 15 years with no degradation. Invisible visual presence with unbelievable strength
- ★ Gives clients who want a superior half-round gutter without an external fascia bracket a powerful option
- ★ They're amazing. Stronger! Faster! Better!

Adorn your home with Classic Gutter Systems. They have a wide range of colors, metals, and installation options to suit your every need. It's truly like 'Jewelry For Your Home'.[®]

TESTIMONIALS

In my many many years with This Old House, we used Classic Gutter Systems 12 times over a 25-year period. They possess the same quality standards I do. On my own house in 2013 it was time to install new gutters, Classic Gutters were my go-to choice. I couldn't be happier with the result, quality and durability. Now they're even offering 11' seamless lengths of radius gutters, amazing!

- Norm Abrams
Carlisle, Massachusetts

Thanks to Classic's unique and custom half-round gutter systems, we've been able to offer elegant, high-end solutions for some of the most distinguished homes in the state. Their commitment to craftsmanship and innovation continues to set them apart. We're proud to have worked with Classic for over 20 years, and we value the trust, consistency, and quality they bring to every order.

- John Laurie, Great Lakes Gutter
Livonia, Michigan

We're the biggest gutter company in the Miami Dade area and we sell a lot of gutter components, but when it comes to half round Classic Gutter Systems is where we go. Their brackets are so superior its not even close, from castings to their new patented Strongback and Beast "WOW, AWESOME".

- Elbyn Del Rio, Seamless Gutter Masters
Miami, Florida

I have always known that half-round gutter is superior to k-style gutter, but there really wasn't a go-to place to get the components needed to complete a job properly. Well, that problem is solved. Classic Gutters Systems is amazing. I mean, just look at the selection, quality and diversity. Its extraordinary!

- Dane Wolford, CKC Gutter Specialist
Youngstown, Ohio

What Classic Gutters has created with their half-round machines and bracketry, allows me to go to a homeowner and explain to them the superiority of half-round gutters. I feel not just proud, but excited to give them a flat-out awesome gutter system for their home. They get a superior custom look with unequalled functionality, and I get the pride of installing a system that blows away k-style, and invariably earns me references for half-round jobs because its just that good.

- David Strong, Boise Gutter
Boise, Idaho

Classic Gutters is what happens when a mad scientist with a relentless pursuit of old world quality, customer service and innovation takes aim at the gutter world. They are a true inspiration and example for anyone trying to reach the pinnacle of their industry.

- Tom & Nicole Anthony, Max-Flow
Seamless Gutters | Syracuse, New York

Being from the heart of Cajun country, we get requests for a lot of French style components. We just love what Classic Gutter Systems brings to the table with all the casting, spherical endcaps, and of course the Fleur de Lis emblems. We feel comfortable bidding any project because of the amazing choices they offer and quality and service that is second to none. It's like having a partner that cares about the results.

- Josh Napier, Napier Sheet Metal
Jeanerette, Louisiana

We couldn't be more pleased with Classic Gutters. We have always admired and respected the standard of excellence they maintain. They have a selection of half-round bracketry unmatched in the gutter industry. It's not even close. In Florida, we're doing more and more half-round gutter and our clients just love what we offer. Classic brings distinction and value to our customers homes.

- Ralph & Dominick Palermo, Rain
Control Aluminum | Naples, Florida

Classic Gutter Systems sets the standard for craftsmanship and quality of half-round gutter accessories. Their new patented Strongback® and Beast® brackets make installation a joy. I can quickly illustrate to the customer how much stronger and superior they are. And for me, twice as fast to install. It's a WIN-WIN-WIN!

- Jeff Cope, Gutter Solutions
Eatonton, Georgia
